Hi Mike,

I have rerun the dietary analyses (to include all pop subgroups) and am now starting on the dietary memo. I made a subbean (D460362) for this purpose (off the parent bean 453397).

Will

Hi Mike,

I ran the numbers for the occupational handlers. In the past we've used our surrogate data as well as a chem-specific study based on the low-dust formulation. As expected and in line with our past assessments, there are risks with our surrogate exposure data, but no risks with the chem-specific data. I'll write this up similar to how we had it in the DRA.

~Kelly
